## Important Information About Your Drinking Water

### Reporting Requirements Not Met for Huntsville Town Water System

Your water system was recently cited for a violation. Even though this was not an emergency and there was no safety issue involved, as our customers, you have a right to know what happened and what we did to correct the problem.

We are required to monitor your drinking water for specific contaminants and disinfectant (chlorine) residual on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During a few days in February 2023 our chlorine monitoring system failed to report the disinfectant residual at the entry point to the distribution system-at our water treatment plant.

#### What should I do?

There is nothing you need to do. We are required to monitor chlorine and report on a daily basis. We were unable to do so for portions of 6 days in February 2023 due to the chlorine monitoring equipment malfunction.

#### What happened? What is being done?

The malfunction with the chlorine monitoring system was repaired and tested. Testing indicated that at no time during the non-monitored period was the disinfectant level below State standards. We resumed regular reporting on February 16, 2023. For more information, please contact Shannon Smith, Huntsville Town Water Department, 801 745-3420, [waterbilling@huntsvilletown.com](mailto:waterbilling@huntsvilletown.com)

Please share this information with all other people who drink this water, especially those who may not receive this notice directly. We will do our best to inform all water customers.

This notice is being sent to you by the Huntsville Town Water Department, Water System ID# 26091.
